Product preview · In development

OFFPEAK for holders

OFFPEAK sells open-model AI inference from real, bonded GPUs at prices that drop when those GPUs are idle, settled in USDG on Robinhood Chain.

Launching in phases on Robinhood Chain. See the roadmap for what is live.

Why it matters

- **Real compute, not resold credits.** Every model is open-weight and served by a registered, bonded host. OFFPEAK doesn't proxy any third-party API account.
- **The discount comes from idle time.** Hosts post 168 hourly prices, and router-measured load can cut a quiet host's live price to 0.4× its posted price.
- **Your balance is cash.** Prepaid USDG sits in a vault that you can withdraw from. Withdraw-all completes within 2 hours.
- **Agents pay as they go.** Payment channels and x402 let an agent pay per call with no account.
- **Proof, not promises.** Every response carries a usage record signed by the router and the host, and hourly totals go on chain. Hosts bond USDG and are audited for model swaps.

What $OFPK does

$OFPK is a utility token. Its hooks switch on after written legal review.

- **Fee tiers.** Lock $OFPK to lower the 4% OFFPEAK fee by up to 1 percentage point.
- **Early Window access.** First access to Windows, OFFPEAK's tradable capacity reservations.
- **Host bond weight.** $OFPK bonded by a host ranks it higher in routing, capped at +25%, and is slashable.
- **Burn.** 5% of fees buys and burns $OFPK.

Holding $OFPK alone earns nothing. It is not a share of fees, a yield or an investment.

Upcoming catalysts

These are planned, in order, with no dates set:

1. **External contract audit**, then mainnet contracts on Robinhood Chain with a 500 USDG per-buyer beta cap.
2. **Real GPU hosts and launch models** on the OpenAI-compatible API.
3. **Agent payments:** channels and x402 on mainnet, plus night jobs.
4. **Windows:** tradable future-capacity reservations, plus the sealed tier.
5. **$OFPK hooks switched on**, but only after legal review.

Official links

- Website: offpeakai.app. This is the planned public address and is not live yet.
- X: @UseOffPeak
- Telegram: t.me/offpeakrh, linked from the official X bio
- Email: Offpeaky99@atomicmail.io
- **$OFPK contract address: to be announced.**

> **Only trust these links.** OFFPEAK will announce a contract address only through the channels above. Anyone offering an "official" $OFPK address, presale or airdrop elsewhere is not us.
